

Gazelle AH-MK1 HA-LFR

490,000.00 EUR

SOLD

ASI is proud to introduce our Aerospatiale Gazelle Helicopter – the epitome of power, agility, and versatility in the world of aviation!

Looking to soar to new heights? The Aerospatiale Gazelle is the answer! With its sleek and aerodynamic design, this helicopter is a true marvel of engineering. Whether you're a seasoned pilot or a beginner, the Gazelle is designed to provide you with an unparalleled flying experience.

Experience the thrill of speed as you take off with the Gazelle's powerful turbine engine, capable of reaching impressive speeds of up to 310 km/h (193 mph). Maneuver with precision and ease through tight spaces, thanks to the Gazelle's exceptional agility and responsiveness. Its compact size and exceptional visibility from the cockpit make it ideal for a wide range of missions, from reconnaissance and surveillance to search and rescue operations.

Built for versatility, the Gazelle can be configured for a wide range of missions and roles, including military, law enforcement, emergency medical services, and more. With its spacious cabin, the Gazelle can comfortably accommodate up to five passengers, or carry vital cargo with its generous payload capacity.

Safety is always a top priority, and the Aerospatiale Gazelle is equipped with advanced avionics and safety features to ensure a secure and reliable flight. With its exceptional performance capabilities, the Gazelle is trusted by pilots around the world for its reliability and durability in even the most challenging environments.

Don't miss out on the opportunity to own a piece of aviation history with the Aerospatiale Gazelle Helicopter. Whether you're a professional pilot or a passionate aviation enthusiast, the Gazelle is sure to exceed your expectations and take your flying experience to new heights.

Contact us now to schedule a demo flight and experience the Aerospatiale Gazelle for yourself. Fly with confidence, fly with the Gazelle!

Pictures are just to give an Idea if the Helicopter and are not the originals yet!
