

## Schweizer 300 OM-ARM

**125,000.00 EUR**

+ EU Vat

ASI are proud to present this Schweizer 300 -269C helicopter.

Built in 1987 and equipped with the fuel injected Lycoming HIO-360-D1A engine this is a fantastic and economical little helicopter.

Ideal for private flying or flight training, unlike the Robinson products that have calendar limited components this is not the case with the Schweizer so it does not matter if you fly 50 hours per year or 500.

This aircraft is in excellent condition and fully airworthy with just over 4000 hours total time and a recently replaced engine with less than 500 hours since new, all components have excellent remaining times. We can assist with registration to other EASA states or export to the FAA

## Aircraft details

AIRCRAFT TYPE	Helicopter
MAKE	Schweizer
MODEL	Schweizer 300/269C
