

2008 Cirrus SR22T G3 N221TX

380,000.00 EUR

The Cirrus SR22 is an extremely modern and well equipped aircraft offering top of the class safety, reliability and comfort. The revolutionary CAPS system gives the pilot peace of mind through the airframe parachute system.

Our example has just 237 hours on the turbo-normalised Continental six-cylinder engine and a well equipped IFR panel ready for touring around the Europe. With TKS and Oxygen systems installed it is capable of flight in almost any conditions.

Fresh annual 03/2024, line cutters replaced, pitot static check, ect

VAT Paid, Contact Aviation Sales International to buy your new-to-you Cirrus today!
