

Aerospool WT9 RG - D-MFCF

149,995.00 EUR

The Aerospool WT9 is a modern, high performance ultralight aircraft perfect for anyone looking for an accessible and affordable entry into complex aircraft.

Our example is a beautiful, 2004 model equipped with retractable undercarriage and a constant speed propeller. The modern Garmin G3X avionics give the pilot a highly capable aircraft for a fraction of the cost of a certified aircraft. The aircraft is well equipped and ready to go featuring an engine/gearbox overhaul in 2020 with 2 new carburetors as well as a prop overhaul in 2023. Fresh ARC with new brakes, reinforced landing gear, new wheels and a rescue system overhaul in 2021. Complete maintenance documents available upon request.
