Bell 206 B3 Jet Ranger D-HMXV

+ EU Vat
SOLD

We are proud to present this outstanding Bell 206 B3 built in 1986. With 4350 hours total time and two owners since new the aircraft presents very well. Until recently the helicopter was owned by a government and used for VIP flights, the aircraft had been maintained regardless of cost and everything is well documented. Recently the helicopter was imported to Germany and is now on the LBA register and just completed major maintenance by Rotorflug, Friedrichsdorf. We were advised that during power checks that the engine was producing 8% more power than stock and that it would cruise at 120knots true. With excellent remaining times on all components and a recently refitted leather interior, if you are looking for a Jet Ranger then you have got to check out this B3.

Aircraft details
