

Piper Pa-31-350 Navajo Chieftain G-VIPY

235,000.00 EUR

+ EU Vat
SOLD

ASI are proud to present this Piper PA31-350 Chieftain built in 1978 and configured as a commuter aircraft with seating for ten. The aircraft can go into commercial service under an AOC as the engines are in time and calendar with 780 hours since overhaul in November 2015. Currently the aircraft is registered under the United Kingdom CAA but we can assist with registration under EASA or the FAA. The Chieftain is a real work horse and although high hours in comparison to a lot of aircraft models at just under 16,000hours total time this is nothing for a PA31 and this one has been maintained to a high standard until recently it was owned and operated under the AOC of Capital Air Ambulance. The aircraft is about to undergo a fresh annual/100 hour inspection and will be sold ready to fly away. Both the interior and exterior present well along with a sensible IFR avionics fit. If you are looking for an economical aircraft that will carry a heavy load be it people or cargo then

look no further. The aircraft is located in our showroom at Neustadt Aisch EDQN and any potential buyer is welcome to view at any time.

Aircraft details

AIRCRAFT TYPE	Multi Engine Piston
MAKE	Piper
MODEL	PA-31-350
YEAR	1978
REGISTRATION	G-VIPY
